HACK876 × DIGIVIEW SECURITY

PRIVATE PARTNERSHIP PROPOSAL

Show students how technology works beyond the screen.

Most students meet technology as an app. DigiView's technicians meet it as cable, power, cameras and a network that has to work on site. Hack876 would like students to see that side too.

Kingston, Jamaica · Feb 20, 2027 (tentative)

80	9	1
STUDENTS	SCHOOL NETWORK	DAY

One day to build something that should exist.

01 WHAT IS HACK876?

Meet Hack876.

Hack876 is a one-day build competition for approximately **80 secondary-school students** from 5th Form through Upper 6th Form, working in teams of 3 to 4, roughly 20 teams in all, on Saturday, February 20, 2027 (tentative).

Teams pick a real problem, use modern tools including AI, get guidance from mentors, and finish the day with a working prototype and a pitch to judges. It is not a school assignment and there is no answer key.

Our **9-school network** in Kingston is made up of the schools where the Hack876 team currently has relationships and can coordinate most reliably. It is not an exclusive eligibility list.

BUILD SOMETHING THAT SHOULD EXIST.

Technology you can hold, wire and install.

Hack876 is open to hardware as well as software. Students who want to build something physical need to meet people who do it for a living.

DigiView Security Limited was established in 2007 and supplies digital security products across Jamaica.[1]

It installs systems directly, through its own team of trained technicians.[1]

It describes itself as Jamaica's sole authorised supplier and distributor of TVT products.[1]

It has offices in St Andrew and St James, and a retail showroom on Beechwood Avenue in Kingston.[1]

Electronics, networking and installation, done as a trade.

SINCE 2007

A Jamaican technology supplier.

Security camera systems, sold directly and to resellers, installers and security companies.[1]

TECHNICIANS

People who install what they sell.

Direct installations by trained technicians, with staff who help customers troubleshoot.[1]

DISTRIBUTION

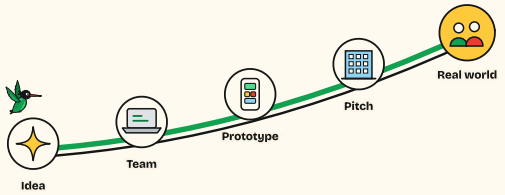

The parts behind a system.

TVT products, Western Digital Purple surveillance hard drives, Securelink wires and accessories, and 2GIG and KanTech products.[1]

ENGINEERING

A system built to move.

Its Mobile Surveillance Command Centre carries eight on-board cameras and can stream up to 56 wired or wireless cameras back to the unit.[3]

Behind every one of these is a set of skills a student could learn: electronics, networking, power and working on site.

9 schools. One room.

Hack876 begins with the schools where we already have relationships and can coordinate most reliably for the inaugural staging. Formal confirmations are still in progress, and the network is not an exclusive eligibility list.

- Hillel Academy
- Campion College
- Jamaica College
- Immaculate Conception High School
- Wolmer's
- Ardenne High School
- American International School of Kingston
- St. Andrew High School for Girls
- St. George's College

There are two natural homes for this inside DigiView.

DigiView lists Marketing@digiviewsecurity.com and sales@digiviewsecurity.com for enquiries.[2]

CONTRIBUTION

Support at any level

- A monetary contribution at any level
- Toward equipment and materials teams build with
- Or suitable components in kind

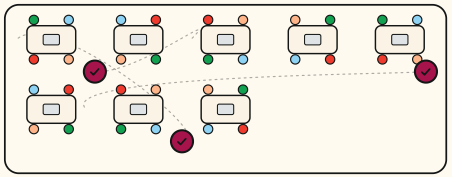

PEOPLE

Technicians in the room

- Technical mentors for hardware teams
- A supervised demonstration of how a system fits together
- An honest talk about technical careers

DigiView's contribution does not have to be purely financial.

PEOPLE IN THE ROOM.

01
Technical mentors

Technicians who help teams with wiring, power and getting devices to talk to each other.

02
Demonstration

A short, supervised look at how the parts of a system connect, run by DigiView staff.

03
Speaker

A short talk on what a technical career in installation and networking looks like.

04
Volunteers

Staff who help with set-up and keeping the day on time.

GROUND RULES WE WILL HOLD OURSELVES TO

Any demonstration is about how the equipment works. Students are not recorded or monitored, and DigiView is not being asked to secure the venue.

No selling to students and no collection of student contact details by sponsors.

Sponsor staff mentor and present; the judging panel decides every award.

07 OUR INVITATION

Become a Bronze Partner of the inaugural Hack876.

J$50,000 to below J$200,000

BRONZE PARTNER · INAUGURAL HACK876

A Bronze contribution helps support the equipment and materials teams build with. DigiView's technicians in the room would be worth as much again.

Any amount within the level is welcome. It is a flexible contribution toward the event, with no naming rights attached.

PROPOSED RECOGNITION

DigiView Security

Bronze Partner · Inaugural Hack876

Closest Hack876 tracks: Resilience, Business, Wildcard

CONTRIBUTION LEVELS. ANY AMOUNT WITHIN A LEVEL IS WELCOME.

Bronze Partner (SUGGESTED)	Silver Partner	Gold Partner	Platinum Partner
J$50,000 to below J$200,000	J$200,000 to below J$500,000	J$500,000 to below J$1,000,000	J$1,000,000+

In-kind & Community Support: devices, gift cards, meals, refreshments, supplies, connectivity, expertise, and contributions below J$50,000.

What each level receives.

Bronze Partner

J$50,000 to below J$200,000

OUR SUGGESTION

- Recognition on the Hack876 website
- Included in the grouped sponsor thank-you
- Named in the post-event recap

Silver Partner

J$200,000 to below J$500,000

- Everything in Bronze
- Placement on event signage
- Acknowledgement in the opening and closing

Gold Partner

J$500,000 to below J$1,000,000

- Everything in Silver
- More prominent placement
- A dedicated sponsor feature
- Logo on event shirts, if shirts are produced*

Platinum Partner

J$1,000,000+

- The most prominent sponsor placement
- An agreed opportunity to take part in the programme
- Logo on event shirts, if shirts are produced*

These are proposed benefits, to be agreed when a sponsorship is confirmed. A sponsor can contribute any amount within a band.

*Shirt placement applies only if event shirts are produced and artwork arrives before the production deadline.

Speaking, mentoring, presenting an award and judging are subject to suitability and programme capacity. Sponsorship does not buy influence over judging, and no level carries naming rights.

09 WHERE A CONTRIBUTION GOES

No contribution has to cover a whole cost.

WHAT A CONTRIBUTION COULD SUPPORT

- **Equipment.** Helps support the equipment teams build with.
- **Programming.** Helps support mentoring, judging and the student programme.
- **Materials.** Contributes toward participant materials and supplies.

A sponsor can support the event overall, or agree a specific use with the Hack876 team. No contribution has to cover a whole cost.

In-kind & Community Support

For devices, gift cards, meals, refreshments, supplies, connectivity, expertise, and for contributions below J$50,000.

A meaningful in-kind contribution can be recognized at an equivalent level, based on a usable value agreed together. The advertised value of software credits or volunteer hours is not counted as cash automatically.

10 A DIRECT LINE

There is no faceless sponsorship process here.

This proposal is for **the marketing team at DigiView Security Limited**.[2]

If DigiView is interested, we can decide together what involvement should actually look like.

QUESTIONS WE WOULD ANSWER TOGETHER

- ✓ What would a demonstration involve, and how is it supervised?
- ✓ How much time would technicians need to give?
- ✓ When and where is it?
- ✓ What exactly would a contribution help pay for?
- ✓ How are students protected on consent, data and marketing?

A conversation, not a workload.

Deliberately focused.

Our vision is national. This inaugural staging does not have national-event resources, and we will not pretend it does.

Approximately 80 students. A school network of 9 in Kingston. One day, done properly.

Build the first one well.
Learn from it.
Earn the right to make the second one bigger.

2027

Help make the first Hack876 happen.

No multi-year commitment required.

FUTURE POSSIBILITIES, ONLY IF BOTH SIDES FIND IT VALUABLE. NOT COMMITMENTS.

- A DigiView technician on the mentor bench each year.
- A hardware help desk for teams building physical projects.
- Workplace visits for interested students, arranged through their schools.

HACK876 × DIGIVIEW SECURITY

Somewhere in that room may be a future founder, engineer, designer or leader.

They do not need us to decide who they become.

They need an opportunity to begin.

HELP US BUILD THAT OPPORTUNITY.

We would love to explore the right first step with the DigiView team.
