HACK876 × TANK-WELD

PRIVATE PARTNERSHIP PROPOSAL

Jamaica needs more young people who know they can build.

Tank-Weld began as a steel fabrication company and has spent years putting homework and computer centres into communities. Hack876 gives students one day to find out that building things is something they can do.

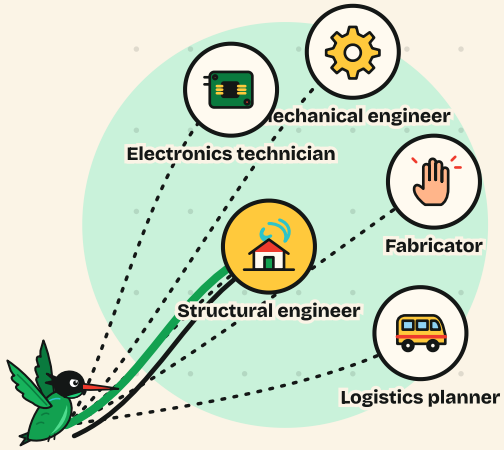

Kingston, Jamaica · Feb 20, 2027 (tentative)

80	9	1
STUDENTS	SCHOOL NETWORK	DAY

One day to build something that should exist.

What if young Jamaicans experienced themselves as builders before anyone told them what career they should have?

Before the degree.

Before the first job.

Before anyone hands them a title.

There is usually a first moment when someone realizes: I can build this.

For most young people, that moment arrives late, if it arrives at all.

Hack876 is designed to create more of those moments.

Meet Hack876.

Hack876 is a one-day build competition for approximately **80 secondary-school students** from 5th Form through Upper 6th Form, working in teams of 3 to 4, roughly 20 teams in all, on Saturday, February 20, 2027 (tentative).

Teams pick a real problem, use modern tools including AI, get guidance from mentors, and finish the day with a working prototype and a pitch to judges. It is not a school assignment and there is no answer key.

Our **9-school network** in Kingston is made up of the schools where the Hack876 team currently has relationships and can coordinate most reliably. It is not an exclusive eligibility list.

BUILD SOMETHING THAT SHOULD EXIST.

03 NOT JUST APPS

A hackathon is bigger than software.

Hack876 is an open build competition. Teams choose the problem and the medium.

Some will write code. Some will wire circuits. Some will design a service, a business or a tool nobody has thought of yet.

A team might build:

- A piece of software
- An AI tool
- An automation
- A data product
- A tool for small businesses
- Hardware
- A robot
- A physical prototype
- A resilience solution
- Something none of us expected

The medium does not matter.

The instinct to create does.

A company that builds, in a room full of students learning to.

Hack876 is not only about apps. Teams can build hardware, physical prototypes and tools for real industries, and they need to meet people who make things.

TANK-WELD, GIVING BACK

“Tank-Weld has a very strong sense of community.”[1]

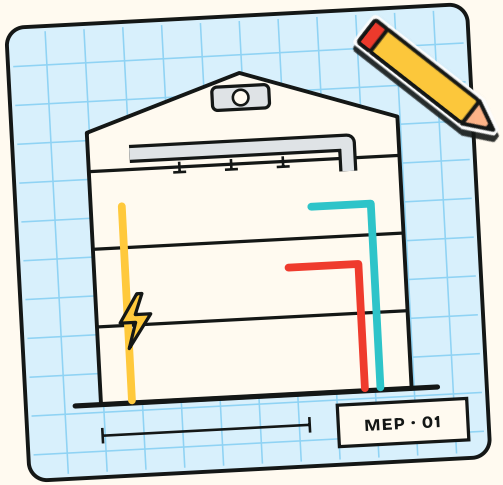

Tank-Weld was formed in 1970 as a steel fabrication company. Today the group also runs heavy haulage, equipment and piling businesses, and operates at the Rio Bueno port.[2]

Over the years it has built computer centres and homework centres, basketball courts and soccer stadiums, and repaired schools and churches.[1]

Since 2006 its scholarship programme has grown to more than 70 scholarships a year.[1]

Steel, and somewhere safe to do homework.

1970	**Formed as a steel fabrication company.** It has since grown into a group that distributes building materials and manufactures several of its own steel products.[2]
2006	**A scholarship programme begins.** Started to encourage education, it now awards more than 70 scholarships a year.[1]
2007	**The Fiwi Centre opens in Waterhouse.** A computer and homework centre set up to give children in the community a safe place for homework help and basic computer classes.[3]
2024	**The centre is re-equipped.** The JMMB Joan Duncan Foundation reports donating 15 computers to the Fi-Wi Homework Centre, which it describes as operated with the support of Tank-Weld Metals.[4]

Tank-Weld has already put computers in front of children who did not have them. Hack876 is what a student can do with one a few years later.

06 THE SCHOOL NETWORK

9 schools. One room.

Hack876 begins with the schools where we already have relationships and can coordinate most reliably for the inaugural staging. Formal confirmations are still in progress, and the network is not an exclusive eligibility list.

- Hillel Academy
- Campion College
- Jamaica College
- Immaculate Conception High School
- Wolmer's
- Ardenne High School
- American International School of Kingston
- St. Andrew High School for Girls
- St. George's College

There are two natural homes for this inside Tank-Weld.

Tank-Weld lists info@tankweld.com for enquiries.[2]

CONTRIBUTION

A Silver contribution

- Toward equipment and materials teams build with
- Helps support mentoring and the student programme
- Any amount, at any level, is welcome

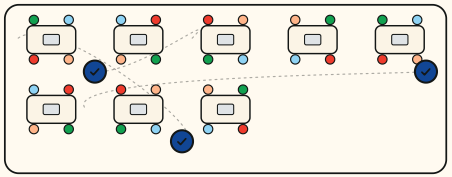

PEOPLE AND PRACTICAL HELP

Builders in the room

- Engineers and technical staff as mentors
- Safe materials for physical prototypes
- A short talk on careers in engineering, manufacturing and logistics
- Help moving equipment to the venue, if useful

Tank-Weld's contribution does not have to be purely financial.

PEOPLE IN THE ROOM.

01
Technical mentors

Engineers and technical staff who help teams think through how a physical thing would actually be made.

02
Speaker

A short talk on what work in engineering, manufacturing and logistics looks like in Jamaica.

03
Judging support

Tank-Weld staff can advise on practical feasibility; the final call sits with the judging panel.

04
Materials

Safe, light materials for prototypes, agreed in advance with the Hack876 team.

05
Logistics

Help getting equipment to and from the venue, if Tank-Weld has capacity.

GROUND RULES WE WILL HOLD OURSELVES TO

No welding, cutting or other hazardous fabrication at the event. Prototypes use safe, light materials only.

No collection of student contact details by sponsors. Photos and names only with school and parent consent.

Sponsor staff mentor and present; the judging panel decides every award.

The honest answer to the visibility questions.

Will Tank-Weld be visible? Yes, across event materials, programming and post-event storytelling, at a level that matches the partnership.

Is the audience relevant? It is the next generation of Jamaican builders, professionals and leaders, met early.

Can it build longer relationships? Yes, through people, schools and a second year, not through leads.

WHO IS IN AND AROUND THE ROOM

Ambitious secondary-school students
Approximately 80 of them, from 5th Form through Upper 6th Form.

Parents and families
Who see who showed up for their children.

Teachers and school communities
Across our network of 9 schools in Kingston.

Future university students
Making choices about what to study and where.

Future founders and professionals
Meeting Tank-Weld early, and in the right way.

Many participants are minors. We will not promise leads, reach, impressions or data.

Become a Silver Partner of the inaugural Hack876.

J$200,000 to below J$500,000

SILVER PARTNER · INAUGURAL HACK876

Silver helps support the equipment and materials that let teams build something physical, not only something on a screen. If a different level suits Tank-Weld better, any of them is welcome.

Any amount within the level is welcome. It is a flexible contribution toward the event, with no naming rights attached.

PROPOSED RECOGNITION

Tank-Weld

Silver Partner · Inaugural Hack876

Closest Hack876 tracks: Move, Resilience, Business

CONTRIBUTION LEVELS. ANY AMOUNT WITHIN A LEVEL IS WELCOME.

Bronze Partner	Silver Partner	Gold Partner	Platinum Partner
J$50,000 to below J$200,000	SUGGESTED J$200,000 to below J$500,000	J$500,000 to below J$1,000,000	J$1,000,000+

In-kind & Community Support: devices, gift cards, meals, refreshments, supplies, connectivity, expertise, and contributions below J$50,000.

11 CONTRIBUTION LEVELS

What each level receives.

Bronze Partner

J$50,000 to below J$200,000

- Recognition on the Hack876 website
- Included in the grouped sponsor thank-you
- Named in the post-event recap

Silver Partner

J$200,000 to below J$500,000

OUR SUGGESTION

- Everything in Bronze
- Placement on event signage
- Acknowledgement in the opening and closing

Gold Partner

J$500,000 to below J$1,000,000

- Everything in Silver
- More prominent placement
- A dedicated sponsor feature
- Logo on event shirts, if shirts are produced*

Platinum Partner

J$1,000,000+

- The most prominent sponsor placement
- An agreed opportunity to take part in the programme
- Logo on event shirts, if shirts are produced*

These are proposed benefits, to be agreed when a sponsorship is confirmed. A sponsor can contribute any amount within a band.

*Shirt placement applies only if event shirts are produced and artwork arrives before the production deadline.

Speaking, mentoring, presenting an award and judging are subject to suitability and programme capacity. Sponsorship does not buy influence over judging, and no level carries naming rights.

No contribution has to cover a whole cost.

WHAT A CONTRIBUTION COULD SUPPORT

- **Equipment.** Helps support the equipment teams build with.
- **Materials.** Contributes toward participant materials and supplies.
- **Programming.** Helps support mentoring, judging and the student programme.
- **Logistics.** Contributes toward running the day.

A sponsor can support the event overall, or agree a specific use with the Hack876 team. No contribution has to cover a whole cost.

In-kind & Community Support

For devices, gift cards, meals, refreshments, supplies, connectivity, expertise, and for contributions below J$50,000.

A meaningful in-kind contribution can be recognized at an equivalent level, based on a usable value agreed together. The advertised value of software credits or volunteer hours is not counted as cash automatically.

13 A DIRECT LINE

There is no faceless sponsorship process here.

This proposal is for **the Tank-Weld Group team**.[2]

If Tank-Weld is interested, we can decide together what involvement should actually look like.

QUESTIONS WE WOULD ANSWER TOGETHER

- ✓ What would our contribution help pay for?
- ✓ How much time would our engineers need to give?
- ✓ What materials are safe and useful for student prototypes?
- ✓ When and where is it?
- ✓ How are students protected on consent, data and marketing?

A conversation, not a workload.

Deliberately focused.

Our vision is national. This inaugural staging does not have national-event resources, and we will not pretend it does.

Approximately 80 students. A school network of 9 in Kingston. One day, done properly.

Build the first one well.
Learn from it.
Earn the right to make the second one bigger.

2027

Help make the first Hack876 happen.

No multi-year commitment required.

FUTURE POSSIBILITIES, ONLY IF BOTH SIDES FIND IT VALUABLE. NOT COMMITMENTS.

- A Tank-Weld engineer on the mentor bench each year.
- A build challenge drawn from a real engineering or logistics problem.
- Site or workshop visits for interested students, arranged through their schools.

HACK876 × TANK-WELD

Somewhere in that room may be a future founder, engineer, designer or leader.

They do not need us to decide who they become.

They need an opportunity to begin.

HELP US BUILD THAT OPPORTUNITY.

We would love to explore the right first step with the Tank-Weld team.
