HACK876 × FIGMA FOR EDUCATION

PRIVATE PARTNERSHIP BRIEF

Build the thing itself.

Hack876 gives Jamaican high-school students one day to turn an idea into something real. We would love Figma to help them make it look and feel right.

Kingston, Jamaica · Feb 20, 2027 (tentative)

80
STUDENTS

9
SCHOOL NETWORK

1
DAY

One day to build something that should exist.

01 WHAT IS HACK876?

Meet Hack876.

Hack876 is a one-day build competition for approximately **80 secondary-school students** from 5th Form through Upper 6th Form, working in teams of 3 to 4, roughly 20 teams in all, on Saturday, February 20, 2027 (tentative).

Teams pick a real problem, use modern tools including AI, get guidance from mentors, and finish the day with a working prototype and a pitch to judges. It is not a school assignment and there is no answer key.

Our **9-school network** in Kingston is made up of the schools where the Hack876 team currently has relationships and can coordinate most reliably. It is not an exclusive eligibility list.

BUILD SOMETHING THAT SHOULD EXIST.

Making is how students learn.

That prompt is a Hack876 brief. Our students spend the day doing exactly that, for their own communities in Kingston.

DAVID CURRAN, EDUCATION LEARNING SPECIALIST, FIGMA

> **“There's a big difference between having an idea and making it real, and in that space is where learning happens.”**[2]

In 2020 Figma for Education opened up to bootcamps, school-sponsored hackathons and other kinds of classrooms, as part of making design accessible to everyone.[3]

Figma says it has always made an effort to show up at hackathons, and invites organisers to email education@figma.com about ways it can help.[1]

Where Figma for Education is available, verified high-school students and educators get the Professional plan free.[4]

Figma's free 10-part curriculum for middle and high school teachers sits alongside prompts like "Design an app to solve a problem in your community."[2]

Hackathons are classrooms too.

2020

Open to school hackathons.

Figma for Education grew beyond degree programmes to include bootcamps and school-sponsored hackathons.[3]

K-12

Free Enterprise for districts.

In 2023 Figma opened free access to all US K-12 districts, with the Enterprise tier, and expanded to Google schools in Japan.[5]

BEYOND THE US

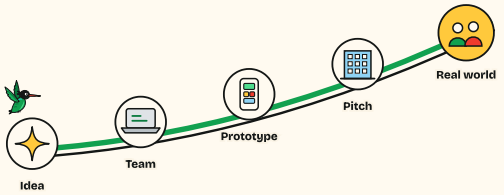

Always looking to expand.

Outside its listed regions, Figma asks schools that want to use it with students to get in touch at education@figma.com.[6]

2026

Product-based learning.

Figma's education team champions students building the thing itself, whether it's an app, a prototype or an interactive experience.[2]

Figma already backs students who learn by making. Hack876 is one more classroom for that, in Kingston.

9 schools. One room.

Hack876 begins with the schools where we already have relationships and can coordinate most reliably for the inaugural staging. Formal confirmations are still in progress, and the network is not an exclusive eligibility list.

- Hillel Academy
- Campion College
- Jamaica College
- Immaculate Conception High School
- Wolmer's
- Ardenne High School
- American International School of Kingston
- St. Andrew High School for Girls
- St. George's College

There are two natural homes for this inside Figma.

Outside its listed regions, Figma may only be used by students above the age of consent in their jurisdiction, and Figma asks schools to reach out at education@figma.com.[6]

EDUCATION TEAM

An award and some guidance

- Figma presents the Best Design award
- Advice on the right way for our students to use Figma
- A short training session or resources before the day

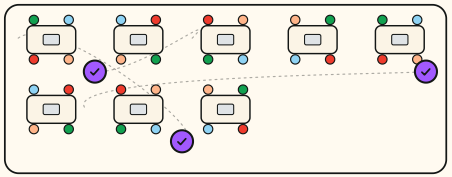

SCHOOLS

The school route, if Figma offers it here

- Participating schools contact Figma for Education directly
- Schools sign Figma's terms for schools, if available in Jamaica
- Teachers keep using it after the hackathon

Figma's contribution does not have to be purely financial.

PEOPLE IN THE ROOM.

01
Award presenter

Someone from Figma presents Best Design, in person or by video.

02
Judging adviser

A Figma designer helps shape the Best Design criteria. The judging panel makes the final call.

03
Pre-event session

A short live training for students or teachers in the weeks before the day.

04
Remote mentors

Designers on a call who help teams with layout, flow and feedback.

05
Teacher resources

Pointers to Figma's high-school curriculum for computing and art teachers.

GROUND RULES WE WILL HOLD OURSELVES TO

No marketing or sign-up drives aimed at students, and no Figma branding beyond what Figma approves.

No student data collected for, or shared with, Figma. Any account is between a student, their school and Figma, under Figma's own terms.

We follow Figma's age and account rules. Students who don't qualify are never asked to work around them.

07 THE ASK

Real design tools for the teams that want them.

Figma for design and prototyping on the day, for teams that want it. Nothing about the event depends on it, and we will not promise any student an account.

Possible structures:

- School route: a participating school contacts Figma for Education and signs its terms for schools, if Figma offers that in Jamaica.
- Self-serve route: only students who are old enough to consent on their own and have a school-issued email apply for the free Education plan.
- Whatever Figma recommends instead. If no route fits, Figma stays optional and teams design with other tools.
- No AI features. Figma Make, the agent in Figma Design and Figma Sites are not available to high-school Education users, and teams do not need them.

AGE AND ACCOUNT TERMS

Figma's Help Center says high-school students must be old enough to consent to the services by themselves, not by a parent or guardian, must apply with a school-issued email, and that Figma for Education is only available in select regions. Figma's Terms require users to be of legal age in their jurisdiction, and 18 or older for Figma AI. Hack876 treats every student under 18 as a minor who needs a parent or guardian's consent. We have not confirmed that Figma for Education is available in Jamaica, Figma has not approved access for our students, and we will follow whatever Figma advises.

Design Tools Partner · Inaugural Hack876

Every option at a glance.

THE ASK

Access

INAUGURAL HACK876

Figma for design and prototyping on the day, for teams that want it. Nothing about the event depends on it, and we will not promise any student an account.

BEST DESIGN, PRESENTED BY FIGMA (PROPOSED)
One award, shaped together.

Proposed

IN-KIND & COMMUNITY SUPPORT
Devices, Gift cards, Meals, Refreshments, Supplies, Connectivity, Expertise.

In kind

PEOPLE IN THE ROOM
Award presenter, judging adviser, pre-event session, remote mentors, teacher resources.

Time

The size of the commitment can change. The invitation to be part of the first one does not.

09 A DIRECT LINE

There is no faceless sponsorship process here.

This proposal is for **Figma for Education team, Figma, Inc.**.[1]

If Figma is interested, we can decide together what involvement should actually look like.

QUESTIONS WE WOULD ANSWER TOGETHER

- ✓ Can Jamaican high-school students use Figma for Education at all?
- ✓ Which of your schools issue student email addresses?
- ✓ How will you handle students who can't consent by themselves?
- ✓ Who judges Best Design, and do teams have to use Figma to win it?
- ✓ What would you need from us, and by when?
- ✓ Will any student data come to Figma?

A conversation, not a workload.

Deliberately focused.

Our vision is national. This inaugural staging does not have national-event resources, and we will not pretend it does.

Approximately 80 students. A school network of 9 in Kingston. One day, done properly.

Build the first one well.
Learn from it.
Earn the right to make the second one bigger.

2027

Help make the first Hack876 happen.

No multi-year commitment required.

FUTURE POSSIBILITIES, ONLY IF BOTH SIDES FIND IT VALUABLE. NOT COMMITMENTS.

- Best Design, presented by Figma, at every Hack876.
- Hack876 schools exploring the school route with Figma for Education.
- Teacher training using Figma's high-school curriculum.
- Design clubs in our schools that build all year, not just on the day.

HACK876 × FIGMA FOR EDUCATION

Somewhere in that room may be a future founder, engineer, designer or leader.

They do not need us to decide who they become.

They need an opportunity to begin.

HELP US BUILD THAT OPPORTUNITY.

We would love to explore the right first step with the Figma for Education team.
