HACK876 × GK GENERAL INSURANCE

PRIVATE PARTNERSHIP PROPOSAL

Invest early in the people who will build Jamaica's next chapter.

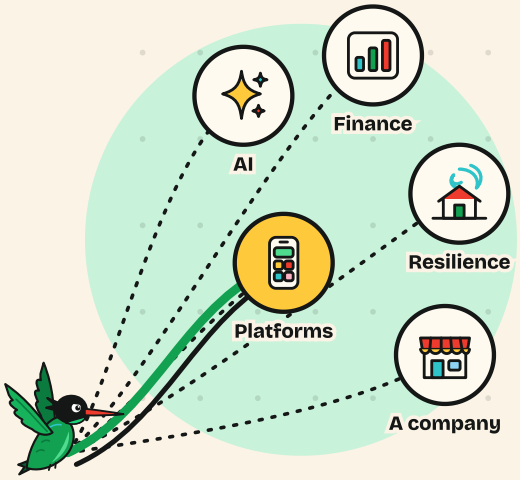

Kingston, Jamaica · Feb 20, 2027 (tentative)

80	9	1
STUDENTS	PARTNER SCHOOLS	DAY

One day to build something that should exist.

What if we met Jamaica's most promising young builders before the world did?

Somewhere in Jamaica today is a student who will build the next financial platform.

Another will design technology that helps families prepare for uncertainty.

Another will start a company.

Another will work in AI, insurance, data, product design, operations or a role that does not have a job title yet.

Most large organizations will first meet them later: at university, at an internship fair, or when an application arrives.

Hack876 creates an opportunity to meet their curiosity and potential sooner.

Meet Hack876.

Hack876 is a one-day build competition bringing together approximately **80 secondary-school students in Jamaica**, anchored by relationships with **9 partner schools in Kingston**.

Students work in teams on open-ended problems, with modern tools including AI, guidance from mentors, and a final pitch to judges.

The partner schools are the institutions where the Hack876 team currently has relationships and can most reliably coordinate the inaugural event. They are not the limit of who can participate.

Hack876 is open to eligible students beyond those partner schools.

Students from elsewhere in Kingston or other parts of Jamaica may apply, subject to event capacity and the application process.

For year one, Hack876 cannot promise transportation, accommodation or other travel support to students outside our immediate network. Students traveling from farther away may need to arrange transportation and lodging independently.

This is a capacity constraint of year one, not a limit on the long-term vision.

Students will arrive with different interests, different skills and different ideas.

By the end of the day, each team will have one objective:

BUILD SOMETHING THAT SHOULD EXIST.

No predetermined answer. **No school assignment.** **No perfect solution waiting in the back of a textbook.**

Just a real problem, a team, limited time and the tools to turn an idea into something tangible.

A hackathon is bigger than software.

The word “hackathon” often brings one image to mind:

A coding contest.

Hack876 is deliberately broader. It is an open build competition, and teams choose the problem.

A team might build:

- A sensor
- An AI tool
- An automation
- A piece of software
- A data product
- A physical prototype
- A robot
- A financial tool
- A transportation solution
- An energy or monitoring system
- A resilience solution
- Something none of us expected

Hardware, physical systems and resilience are first-class Hack876 builds alongside software.

The medium does not matter.

The problem-solving mindset does.

1. Identify a problem
2. Understand the constraints
3. Design a solution
4. Build
5. Test
6. Explain
7. Improve

Then loop back and improve again.

That is Hack876.

Why GraceKennedy?

Because the alignment goes much deeper than sponsorship.

GraceKennedy was founded in Jamaica in 1922 and today operates across Food and Financial Services, with a stated purpose of enriching lives through trusted Food and Financial Services.[1]

For more than four decades, it has also invested in young Jamaicans. The GraceKennedy Foundation was established in 1982, and its scholarship history reaches back to 1980.[2]

That history includes the Carlton Alexander Scholarships for graduates of Jamaica College and the Faustine Sharp Bursary for a St. Andrew High School for Girls 6th Form student. Both schools are among Hack876's partner schools.[2]

Within the Group, GraceKennedy describes insurance as one of its most exciting areas of growth, and GK General Insurance has already been through a digital transformation that introduced GKGOnline.[4]

Trust, judgment, preparation and decisions made under uncertainty sit at the center of that business. At Hack876, students spend the day practicing exactly those skills.

GraceKennedy already invests in young Jamaican talent. Hack876 creates an opportunity to begin that relationship even earlier.

Before the scholarship.

Before the degree.

Before the first job application.

One early opportunity can compound for decades.

1999 — Chaluk Richards receives the GraceKennedy Foundation / Carlton Alexander Scholarship.[3]

2003 — He joins GraceKennedy as an entry-level underwriting associate.[3]

OVER THE YEARS — Roles across underwriting, human resources and operations, and later General Manager of GK General Insurance.[4]

2025 — He is appointed Head of Life & Health Insurance Business at GraceKennedy.[4]

2026 — He serves on the board of the GraceKennedy Foundation, the institution that invested in him first.[3]

2027 — WHOSE JOURNEY COULD BEGIN AT HACK876?

> "The Carlton Alexander scholarship opened doors for me, but it was the exposure, mentorship, and opportunities that truly shaped my journey."
>
> CHALUK RICHARDS[3]

The proposition is not that every Hack876 student will one day work at GraceKennedy.

It is to create more moments where young Jamaican potential meets an institution willing to take it seriously.

- **One introduction.**
- **One mentor.**
- **One conversation.**
- **One person who sees ability before a résumé exists.**

GraceKennedy's own history shows how far an early investment can travel.

Most structured opportunity begins after talent is visible.

By university, students already know certain employers.

Scholarship pathways are underway.

Career preferences are forming, and internships are competitive.

Exceptional students are already being recruited.

Hack876 allows an organization to show up earlier.

Start the relationship before the résumé exists.

STEP 1
Age 16 to 18
A student meets a GraceKennedy professional while demonstrating something she built at Hack876.

STEP 2
University
She studies technology, engineering, business, finance, design, data science or another discipline.

STEP 3
Scholarship and internship years
GraceKennedy is already a name she recognizes as having invested in students like her.

STEP 4
Early career
GraceKennedy is not simply another logo at a recruitment event. It was part of an earlier chapter.

No guarantees and no special access. Just an earlier, more human first impression.

07 SCHOOL RELATIONSHIPS

The opportunity is bigger than individual students.

Hack876 also creates relationships with the institutions developing them.

Our inaugural network begins with 9 schools where we already have relationships.

Teachers | STEM coordinators | Administrators | Parents | Alumni | Future cohorts

Those relationships are the operating infrastructure for year one. They are not intended as a permanent eligibility boundary.

For GraceKennedy, participation means being visible not simply as a company students meet later as customers or job seekers, but as an institution investing in Jamaican curiosity and potential while those students are still discovering what they can become.

Hack876 sits at the beginning of that bridge.

Why Kingston first?

Our ambition is national.

Hack876 is being built by a small team using relationships, facilities and resources we can reliably coordinate today.

For the inaugural event, that means our organized school partnerships are concentrated in Kingston.

That does not mean participation is exclusive to those schools.

Eligible students from other schools and other parts of Jamaica may still apply and participate, subject to event capacity.

The limitation is logistical.

At this stage, Hack876 cannot reliably provide or coordinate transportation, accommodation or travel support for students coming from outside the Kingston area or outside our existing school network.

We would rather be transparent about that than overpromise support we do not yet have the resources to provide.

Our operational capacity in year one is not.

Expanding our organized reach immediately across Jamaica would introduce significantly more:

- Transportation coordination
- Accommodation considerations
- Student supervision
- Safeguarding requirements
- School coordination
- Cost

before we have run the model once. So our approach is simple:

01 **Start with a model we can deliver exceptionally well.**

02 **Test it.**

03 **Learn from it.**

04 **Strengthen it.**

05 **Then expand responsibly.**

Kingston is not the boundary of Hack876.

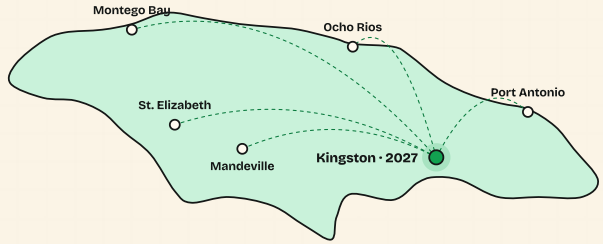

Kingston is where we can responsibly build the first version.

The vision is Jamaica.

The 9 schools are the beginning of the operating network, not the final reach.

They are a starting infrastructure, not an exclusionary boundary.

We want to reach the point where geography does not create a practical barrier to participation.

CURRENT REALITY

Students outside Kingston can participate where capacity allows, but transportation and accommodation may be their responsibility.

FUTURE POSSIBILITIES, NOT 2027 COMMITMENTS

- Transportation support
- Travel stipends
- Accommodation partnerships
- School-supported travel
- Regional qualifying events
- Additional event locations
- Sponsor-supported access programs

We cannot support every logistical need on day one.

But access across Jamaica is what we are building toward.

What GK General Insurance brings cannot be measured only in dollars.

Funding makes Hack876 possible.

But GraceKennedy can contribute something equally valuable:

PEOPLE IN THE ROOM.

People who understand:

Trust · Risk · Customers · Technology · Data · Finance · Operations · Resilience · Businesses that last

- People who can take a 17-year-old's idea seriously.
- People who can ask sharper questions.
- People who can show students careers and problems they have never encountered.

01 Mentors

Helping teams reason through real constraints.

02 Judges

Evaluating problem selection, creativity, execution and communication.

03 Speakers

Showing students the variety of careers inside a modern Jamaican company.

04 Challenge partners

Optionally offering a real-world problem around resilience, customer experience, technology, data or risk.

05 Long-term connectors

Continuing appropriate relationships with schools, students and future Hack876 events.

Any sponsor challenge is optional and sits alongside the open competition. Hack876 stays open.

We do not simply want GraceKennedy's logo in the room.

We want GraceKennedy people in the room.

Become a Platinum Partner of the inaugural Hack876.

J$1,000,000

FOUNDING PARTNER · INAUGURAL HACK876

CONTRIBUTION LEVELS. ANY AMOUNT WITHIN A LEVEL IS WELCOME.

Bronze Partner	Silver Partner	Gold Partner	Platinum Partner
J$50,000 to below J$200,000	J$200,000 to below J$500,000	J$500,000 to below J$1,000,000	J$1,000,000+ SUGGESTED

In-kind & Community Support: devices, gift cards, meals, refreshments, supplies, connectivity, expertise, and contributions below J$50,000.

This is a flexible sponsorship contribution supporting the overall production and student experience of the inaugural Hack876. It is not a prize fund.

It is intentionally not restricted to one line item. The funding lets the Hack876 team deploy resources where they have the greatest impact, across areas such as:

- ✓ Event production
- ✓ Equipment and materials
- ✓ Prizes
- ✓ Operational costs
- ✓ Student experience
- ✓ Food and refreshments
- ✓ Signage and environment
- ✓ Programming and logistics

PROPOSED RECOGNITION

GK General Insurance

Platinum Partner · Inaugural Hack876

We are not simply selling logo inventory.

We are inviting GK General Insurance to be one of the organizations that made the first Hack876 possible.

What Platinum Partnership looks like.

Potential integration includes:

01 Prominent Platinum Partner recognition across Hack876 event materials and digital experiences

02 Recognition during opening and closing programming

03 Opportunity for GraceKennedy leadership to address students

04 Participation of GraceKennedy professionals as judges, mentors and speakers

05 Dedicated GraceKennedy presence within the event

06 Recognition in relevant school and participant communications

07 Inclusion in Hack876 photography, recap content and post-event storytelling

08 Opportunity to collaborate on an appropriate challenge, workshop or special award, for example in resilience, customer experience, technology or financial capability

09 Early conversation around future Hack876 events and expansion

Most importantly: direct participation in the experience of approximately 80 young Jamaicans at a formative point in their education and career thinking.

If Platinum is not the right fit for year one.

There are still meaningful ways to help make the inaugural Hack876 possible. Any amount within a level is welcome.

Bronze Partner

J$50,000 to below J$200,000

- Recognition on the Hack876 website
- Included in the grouped sponsor thank-you
- Named in the post-event recap

Silver Partner

J$200,000 to below J$500,000

- Everything in Bronze
- Placement on event signage
- Acknowledgement in the opening and closing

Gold Partner

J$500,000 to below J$1,000,000

- Everything in Silver
- More prominent placement
- A dedicated sponsor feature
- Logo on event shirts, if shirts are produced*

Platinum Partner

J$1,000,000+

OUR SUGGESTION

- The most prominent sponsor placement
- An agreed opportunity to take part in the programme
- Logo on event shirts, if shirts are produced*

These are proposed benefits, to be agreed when a sponsorship is confirmed. A sponsor can contribute any amount within a band.

*Shirt placement applies only if event shirts are produced and artwork arrives before the production deadline.

Speaking, mentoring, presenting an award and judging are subject to suitability and programme capacity. Sponsorship does not buy influence over judging, and no level carries naming rights.

WHERE A CONTRIBUTION GOES

No contribution has to cover a whole cost.

WHAT A CONTRIBUTION COULD SUPPORT

- **The event overall.** Used where it helps the students most.
- **Prizes.** Contributes toward the prizes for the top teams.
- **Student meals.** Contributes toward meals and refreshments on the day.
- **Equipment.** Helps support the equipment teams build with.
- **Event production.** Helps support staging, sound and the room.
- **Programming.** Helps support mentoring, judging and the student programme.

A sponsor can support the event overall, or agree a specific use with the Hack876 team. No contribution has to cover a whole cost.

WAYS TO HELP WITH A PRIZE

The planned prizes are iPad per student (up to 4); AirPods Pro per student (up to 4); gift card per student (up to 4). Any of these helps:

- **Donating the item**
- **Gift cards or store credit**
- **A monetary contribution toward buying it**
- **Donating some of the quantity needed**
- **A discount on the purchase**

In-kind & Community Support

For devices, gift cards, meals, refreshments, supplies, connectivity, expertise, and for contributions below J$50,000.

A meaningful in-kind contribution can be recognized at an equivalent level, based on a usable value agreed together. The advertised value of software credits or volunteer hours is not counted as cash automatically.

PLATINUM PARTNER

J$1,000,000

FOUNDING PARTNER · INAUGURAL HACK876

Flexible support for the inaugural Hack876 and overall student experience.

GOLD PARTNER

J$500K to <J$1M

Any amount within this level.

SILVER PARTNER

J$200K to <J$500K

Any amount within this level.

BRONZE PARTNER

J$50K to <J$200K

Any amount within this level.

IN-KIND & COMMUNITY SUPPORT

In kind

Devices, Gift cards, Meals, Refreshments, Supplies, Connectivity, Expertise, and contributions below J$50,000.

Our first choice is simple.

We would love to build the inaugural Hack876 with GK General Insurance as a Platinum Partner.

But the larger goal is beginning the relationship.

What success looks like in year one.

Not thousands of students.
Not every parish.
Not a national program overnight.

For the first Hack876, success means executing something smaller exceptionally well while leaving the door open to ambitious students beyond our immediate network.

- ✓ Approximately 80 students.
- ✓ 9 core school relationships.
- ✓ Ambitious young Jamaicans in one room.
- ✓ Working prototypes where there were only ideas that morning.
- ✓ Students meeting professionals they did not know earlier that day.
- ✓ Teachers returning to their schools with new possibilities.
- ✓ Companies encountering young talent earlier.
- ✓ Students leaving with a clearer sense of what they can build.
- ✓ Enough evidence and learning to improve the next Hack876.

Year one proves the model.

What comes next is where this gets interesting.

The first one matters.

Every program that becomes meaningful has a first cohort.

A first room.

A first group of students.

A first group of people willing to support it before there is a long track record.

Hack876 will start small.

But our ambition is not small.

> We want more Jamaican students to see themselves as technologists, engineers, designers, founders, analysts, builders and future leaders.
>
> We want them solving Jamaican problems.
>
> We want them meeting students they would otherwise never meet.
>
> We want the relationships created at Hack876 to continue into university, internships and careers.
>
> And eventually, we want geography and travel resources to stop determining which talented Jamaican students can realistically take part.

PLANT THE SEED EARLY.

Jamaica already produces extraordinary talent.

GraceKennedy's own history shows what can happen when that talent meets opportunity early.

The opportunity is to create more of those moments.

HACK876 × GK GENERAL INSURANCE

Let's build the first one together.
