HACK876 × LORING CONSULTING ENGINEERS

PRIVATE PARTNERSHIP PROPOSAL

Invest early in Jamaica's next generation of engineers, builders and problem solvers.

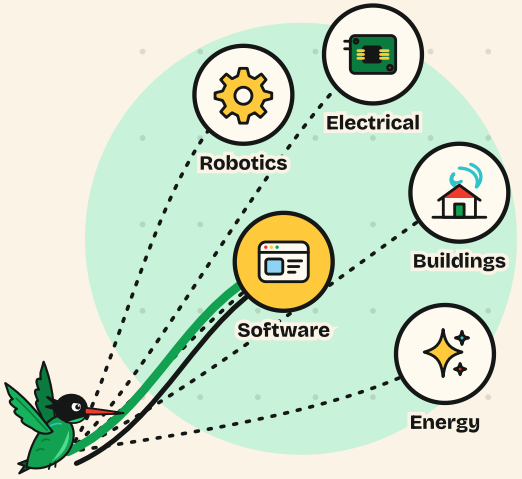

Kingston, Jamaica · Feb 20, 2027 (tentative)

80	9	1
STUDENTS	PARTNER SCHOOLS	DAY

One day to build something that should exist.

What if we met Jamaica's best young builders before the world did?

Somewhere in Jamaica today is a student who will become an electrical engineer.

Another will design smarter buildings.

Another will work in energy.

Another will build robots, infrastructure, software or systems we have not imagined yet.

Most companies will meet them when they are looking for an internship or their first job.

Hack876 creates an opportunity to meet them earlier.

Meet Hack876.

Hack876 is a one-day build competition bringing together approximately **80 secondary-school students in Jamaica**, anchored by relationships with **9 partner schools in Kingston**.

Those schools represent the institutions with which the Hack876 team currently has direct relationships and can coordinate most effectively for the inaugural event.

They are not the limit of who can participate.

Hack876 is open to eligible students beyond those partner schools.

Students from elsewhere in Kingston or other parts of Jamaica may participate, subject to available capacity and the event's application process.

For this inaugural staging, however, Hack876 does not yet have the resources to coordinate transportation, accommodation or other travel logistics for students coming from outside our immediate network.

Students participating from farther away would therefore need to arrange their own transportation and, where necessary, lodging.

This is a capacity constraint of year one, not a limit on the long-term vision.

Students will arrive with different interests, different skills and different ideas.

By the end of the day, each team will have one objective:

BUILD SOMETHING THAT SHOULD EXIST.

No predetermined answer. **No school assignment.** **No perfect solution waiting in the back of a textbook.**

Just a real problem, a team, limited time and the tools to turn an idea into something tangible.

A hackathon is bigger than software.

The word “hackathon” often brings one image to mind:

Students building apps.

Hack876 is deliberately broader.

A team might build:

- A sensor
- A physical prototype
- A robot
- An energy monitoring system
- An AI tool
- A transportation solution
- A new approach to disaster resilience
- A data product
- An automation
- A piece of software

Hardware, energy, infrastructure and physical systems are first-class Hack876 builds.

Or something none of us expected.

The medium does not matter.

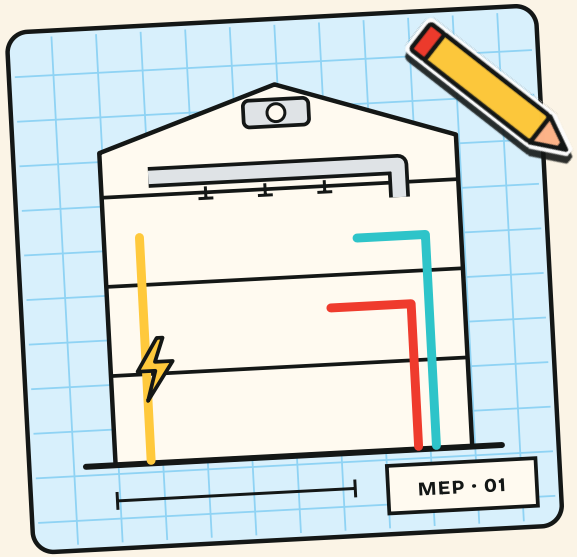

The engineering mindset does.

1. Identify a problem
2. Understand the constraints
3. Design a solution
4. Build
5. Test
6. Explain
7. Improve

Then loop back and improve again.

That is Hack876.

Why Loring?

Because the alignment goes much deeper than sponsorship.

Loring has spent 70 years solving complex engineering problems.[1]

Today, that story increasingly includes Jamaica.

Loring opened its Kingston office in 2023 and formally launched the office in Jamaica in 2026.[2]

The reason matters.

CEO **Oneil Gayle**, born and raised in Jamaica, has spoken about wanting to help expand career pathways for engineers in Jamaica.[2]

Loring is already investing in engineering talent in Jamaica.

Hack876 creates an opportunity to begin that investment even earlier.

Before the internship.

Before the degree.

Before the first job application.

One relationship can compound for decades.

2002 — Oneil Gayle joins Loring as a summer intern.[3]

2016 — He becomes Chief Operating Officer.[4]

2023 — He becomes Chief Executive Officer.[4]

2026 — Loring formally launches its Jamaica office.[2]

2027 — WHOSE JOURNEY COULD BEGIN AT HACK876?

The point is not that every Hack876 student will work for Loring.

The opportunity is to create the conditions for meaningful relationships to begin.

- One introduction.
- One mentor.
- One engineer who takes a student's idea seriously.
- One experience that makes an engineering career feel possible.

Sometimes that is enough to change the direction of a life.

Recruiting usually begins late.

By university graduation, the competition for exceptional engineering talent is already underway.

Students are comparing employers.

Companies are competing for attention.

Recruiters are meeting many of the same candidates at the same career fairs.

Hack876 creates a different kind of opportunity.

Start the relationship before the résumé exists.

STEP 1
Age 17
A student meets a Loring engineer while presenting a prototype at Hack876.

STEP 2
University
She studies electrical, mechanical, civil, computer or another engineering discipline.

STEP 3
Internship years
She already knows Loring.

STEP 4
Graduation
Loring is not simply another employer she discovers at a career fair. It is a company that has been part of her story for years.

That is the kind of return that does not fit neatly into a sponsorship spreadsheet.

The opportunity is bigger than individual students.

Hack876 also creates relationships with the institutions developing them.

Our inaugural network begins with 9 schools where we already have relationships.

Teachers | STEM coordinators | Administrators | Parents | Alumni | Future cohorts

Those relationships make the first staging operationally possible, but Hack876 participation is not intended to be permanently confined to those institutions.

The broader ambition is to create an opportunity that talented students can access regardless of which Jamaican secondary school they attend.

For Loring, participating in Hack876 means becoming visible not simply as an engineering consultancy, but as an organization actively investing in Jamaica's engineering pipeline.

Hack876 sits at the beginning of that bridge.

Why Kingston first?

Our ambition is national.

Hack876 is being built by a small team using relationships, facilities and resources we can reliably coordinate today.

For the inaugural event, that means our organized school partnerships are concentrated in Kingston.

That does not mean participation is exclusive to those schools.

Eligible students from other schools and other parts of Jamaica may still apply and participate, subject to event capacity.

The limitation is logistical.

At this stage, Hack876 cannot reliably provide or coordinate transportation, accommodation or travel support for students coming from outside the Kingston area or outside our existing school network.

Students traveling from farther away would need to make those arrangements independently.

We want to be transparent about that rather than overpromise support we do not yet have the resources to provide.

Our operational capacity in year one is not.

Expanding our organized reach immediately across Jamaica would introduce significantly more:

- Transportation coordination
- Accommodation considerations
- Student supervision
- Safeguarding requirements
- School coordination
- Logistics
- Cost

before we have run the model once.

So we are approaching Hack876 the same way an engineering team approaches a new system:

01 **Build a version we can execute exceptionally well.**

02 **Test it.**

03 **Learn from it.**

04 **Make it repeatable.**

05 **Then expand the infrastructure around it.**

Kingston is not the boundary of Hack876.

Kingston is where we can responsibly build the first version.

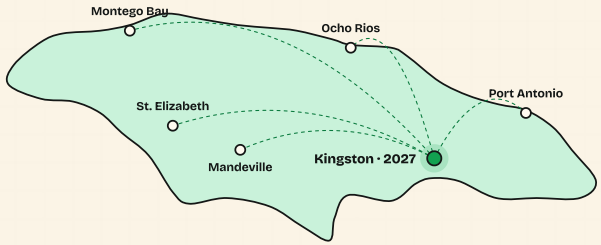

The vision is Jamaica.

From the beginning, Hack876 is intended to be an opportunity for Jamaican students, not simply students from a specific list of schools.

The 9 schools in our inaugural network are where our strongest operating relationships exist today.

They are a starting infrastructure, not an exclusionary boundary.

We want to reach the point where geography does not create a practical barrier to participation.

A student in Montego Bay.

A student in Ocho Rios.

A student in St. Elizabeth.

A student in Mandeville.

A student in Port Antonio.

A student anywhere on the island who wants to build.

Today, an ambitious student outside Kingston may technically be able to participate but still face the real burden of arranging transportation, accommodation or both.

In the future, we want Hack876 to have the partnerships and resources to remove more of those barriers.

THAT COULD EVENTUALLY MEAN · FUTURE POSSIBILITIES, NOT 2027 COMMITMENTS

- Transportation support
- Travel stipends
- Accommodation partnerships
- Regional qualifying events
- Additional event locations
- School-supported travel
- Sponsor-supported access programs

The long-term opportunity is a national platform connecting Jamaica's most ambitious young problem solvers with one another, with universities and with companies capable of helping them turn talent into careers.

We cannot support every logistical need on day one.

But access across Jamaica is what we are building toward.

What Loring brings cannot be measured only in dollars.

Funding makes Hack876 possible.

But Loring can contribute something equally valuable:

ENGINEERS IN THE ROOM.

- People who understand how ideas become systems.
- People who can ask better questions.
- People who have solved problems where the constraints are real.
- People who can show a 17-year-old what an engineering career actually looks like.

01
Mentors
Helping teams think through technical problems.

02
Judges
Evaluating creativity, execution and engineering thinking.

03
Speakers
Showing students where engineering can take them.

04
Challenge partners
Introducing a real-world engineering problem for students to explore.

05
Long-term connectors
Continuing relationships with students and participating schools where appropriate.

ALREADY IN THE ROOM

Johnathan Clarke of Loring Consulting Engineers is already a Hack876 partner.

A long-standing friend of the Hack876 organizers, he is already part of the first cohort of people willing to believe in it before the proof exists.

We do not simply want Loring's logo in the room.

We want Loring's engineers in the room.

Become a Platinum Partner of the inaugural Hack876.

J$1,000,000

FOUNDING PARTNER · INAUGURAL HACK876

CONTRIBUTION LEVELS. ANY AMOUNT WITHIN A LEVEL IS WELCOME.

Bronze Partner	Silver Partner	Gold Partner	Platinum Partner SUGGESTED
J$50,000 to below J$200,000	J$200,000 to below J$500,000	J$500,000 to below J$1,000,000	J$1,000,000+

In-kind & Community Support: devices, gift cards, meals, refreshments, supplies, connectivity, expertise, and contributions below J$50,000.

This is a flexible sponsorship contribution supporting the overall production and student experience of the inaugural Hack876.

It is intentionally not restricted to one line item.

The funding gives the Hack876 team the ability to deploy resources where they have the greatest impact across areas such as:

- ✓ Event production
- ✓ Equipment and materials
- ✓ Prizes
- ✓ Operational costs
- ✓ Student experience
- ✓ Food and refreshments
- ✓ Signage and environment
- ✓ Programming and logistics

PROPOSED RECOGNITION

Loring Consulting Engineers

Platinum Partner · Inaugural Hack876

The goal is not simply to place Loring's logo around the event.

It is to recognize Loring as one of the organizations that helped make the first Hack876 possible.

What Platinum Partnership looks like.

Potential integration includes:

01 Prominent Platinum Partner recognition across Hack876 event materials and digital experiences	**02** Recognition during opening and closing programming	**03** Opportunity for Loring leadership to address students
04 Participation of Loring engineers as judges, mentors and speakers	**05** Dedicated Loring presence within the event	**06** Recognition in relevant school and participant communications
07 Inclusion in Hack876 photography, recap content and post-event storytelling	**08** Opportunity to collaborate on an engineering-focused challenge or special award	**09** Early conversation around future Hack876 events and expansion

Most importantly: direct participation in the experience of approximately 80 young Jamaicans at the moment they are deciding what they might become.

If Platinum is not the right fit for year one.

There are still meaningful ways for Loring to help make the inaugural Hack876 possible. Any amount within a level is welcome.

Bronze Partner

J$50,000 to below J$200,000

- Recognition on the Hack876 website
- Included in the grouped sponsor thank-you
- Named in the post-event recap

Silver Partner

J$200,000 to below J$500,000

- Everything in Bronze
- Placement on event signage
- Acknowledgement in the opening and closing

Gold Partner

J$500,000 to below J$1,000,000

- Everything in Silver
- More prominent placement
- A dedicated sponsor feature
- Logo on event shirts, if shirts are produced*

Platinum Partner

J$1,000,000+

OUR SUGGESTION

- The most prominent sponsor placement
- An agreed opportunity to take part in the programme
- Logo on event shirts, if shirts are produced*

These are proposed benefits, to be agreed when a sponsorship is confirmed. A sponsor can contribute any amount within a band.

*Shirt placement applies only if event shirts are produced and artwork arrives before the production deadline.

Speaking, mentoring, presenting an award and judging are subject to suitability and programme capacity. Sponsorship does not buy influence over judging, and no level carries naming rights.

WHERE A CONTRIBUTION GOES

No contribution has to cover a whole cost.

WHAT A CONTRIBUTION COULD SUPPORT

- **The event overall.** Used where it helps the students most.
- **Prizes.** Contributes toward the prizes for the top teams.
- **Student meals.** Contributes toward meals and refreshments on the day.
- **Equipment.** Helps support the equipment teams build with.
- **Event production.** Helps support staging, sound and the room.
- **Programming.** Helps support mentoring, judging and the student programme.

A sponsor can support the event overall, or agree a specific use with the Hack876 team. No contribution has to cover a whole cost.

WAYS TO HELP WITH A PRIZE

The planned prizes are iPad per student (up to 4); AirPods Pro per student (up to 4); gift card per student (up to 4). Any of these helps:

- **Donating the item**
- **Gift cards or store credit**
- **A monetary contribution toward buying it**
- **Donating some of the quantity needed**
- **A discount on the purchase**

In-kind & Community Support

For devices, gift cards, meals, refreshments, supplies, connectivity, expertise, and for contributions below J$50,000.

A meaningful in-kind contribution can be recognized at an equivalent level, based on a usable value agreed together. The advertised value of software credits or volunteer hours is not counted as cash automatically.

PLATINUM PARTNER

J$1,000,000

FOUNDING PARTNER · INAUGURAL HACK876

Flexible support for the inaugural Hack876 and overall student experience.

GOLD PARTNER

J$500K to <J$1M

Any amount within this level.

SILVER PARTNER

J$200K to <J$500K

Any amount within this level.

BRONZE PARTNER

J$50K to <J$200K

Any amount within this level.

IN-KIND & COMMUNITY SUPPORT

In kind

Devices, Gift cards, Meals, Refreshments, Supplies, Connectivity, Expertise, and contributions below J$50,000.

Our first choice is simple.

We would love to build the inaugural Hack876 with Loring as a Platinum Partner.

But the larger goal is beginning the relationship.

What success looks like in year one.

Not thousands of students.
Not every parish.
Not a national program overnight.

For the first Hack876, success means doing something smaller exceptionally well while leaving the door open to ambitious students beyond our immediate network.

- ✓ Approximately 80 students.
- ✓ 9 core school relationships.
- ✓ A room full of ambitious young people.
- ✓ Working prototypes where there were only ideas that morning.
- ✓ Students meeting engineers they did not know twelve hours earlier.
- ✓ Teachers returning to their schools with new possibilities.
- ✓ Companies discovering talent earlier.
- ✓ Students leaving with a clearer picture of what they are capable of building.
- ✓ And enough evidence to make the next Hack876 bigger and more accessible.

Year one proves the model.

What comes next is where this gets interesting.

The first one matters.

Every program that eventually becomes important has a first cohort.

A first room.

A first group of students.

A first group of people willing to believe in it before the proof exists.

Hack876 will start small.

But our ambition is not small.

> We want more Jamaican students to see themselves as engineers, technologists, designers, founders and builders.
>
> We want them solving Jamaican problems.
>
> We want them building alongside students they would otherwise never meet.
>
> We want the relationships created at Hack876 to continue into university, internships and careers.
>
> And eventually, we want geography and travel resources to stop determining which Jamaican students can realistically take part.

PLANT THE SEED EARLY.

Jamaica already produces extraordinary talent.

The opportunity is to help more of that talent discover what it can become sooner.

HACK876 × LORING CONSULTING ENGINEERS

Let's build the first one together.
