HACK876 × NORUS TECHNOLOGIES

PRIVATE PARTNERSHIP PROPOSAL · FOR JERMAINE HENRY

The most valuable thing Norus could bring to Hack876 is Norus.

Hack876 will put approximately 80 of Jamaica's young makers in one room and give them a day to turn ideas into working prototypes. For the first one, we would love to put some of Jamaica's working builders beside them.

Kingston, Jamaica · Feb 20, 2027 (tentative)

80
YOUNG BUILDERS

20
TEAMS

1
BUILD DAY

Bring the bench.

Meet Hack876.

Hack876 is a one-day build competition for approximately **80 secondary-school students** from 5th Form through Upper 6th Form, working in teams of 3 to 4, roughly 20 teams in all.

Teams pick a real problem, use modern tools including AI, get guidance from mentors, and finish the day with a working prototype and a pitch to judges. It is not a school assignment and there is no answer key.

Our organized inaugural network is the 9 Kingston schools where Hack876 already has relationships. It is not intended to be exclusive to them.

Open to eligible students beyond those schools.

Students elsewhere in Jamaica may take part, subject to capacity. In this first year, Hack876 cannot provide transportation, lodging or travel coordination for students coming from farther away. **That is a year-one constraint, not the long-term vision.**

02 WHAT THEY WILL ACTUALLY BUILD

Real software, by teenagers, against the clock.

Most teams will build something with a screen. Some will wire something up. All of them will have to scope, build, test and demo it by the end of the day.

In other words: the whole software lifecycle, compressed into one very long day.

- A web app
- A mobile app
- An AI tool
- An automation
- A data product
- A tool for a community group
- Hardware
- A physical prototype

```
$ git commit -m "it works on my laptop, demo at 4"
```

Builder to builder.

Jermaine, Norus is a Jamaican-founded company that builds software for a living: custom web and mobile applications, AI development, UI/UX and website design,[1] run through a process of discovery, design, development and delivery.[4]

Your team spans the people a hackathon needs most: developers from junior to lead, project managers, a head of projects, a web designer, and a CTO and CEO who co-founded the company.[2]

And Norus builds for impact. Its own site describes design, software development and product management support for non-profits, social enterprises and impact-driven startups.[2]

Hack876 students will spend the day doing a miniature version of what Norus does every week: understand a problem, scope it, design it, build it and ship something people can use.

Hack876 is not asking Norus to discover youth tech. You are already in it.

EARLY CAREER

Norus Internship Programme

Mentor pairing and comprehensive training to prepare junior developers for professional work.[3]

HIGH SCHOOL

JamCoders

Norus is a partner and sponsor of this summer camp teaching algorithms and programming to high-school students, first launched in 2022 at UWI Mona.[3]

UNIVERSITY

Norus Technologies Education Grant

Each semester, funds for four computer science students in Jamaica, with mentorship and guidance.[3]

UNIVERSITY

Project Calico

Jamaican university students work on open-source projects with an experienced mentor and a stipend for meeting project goals.[3]

COMMUNITY

Kingston Beta

Curation of the long-running Caribbean tech community brand was handed over to Norus in 2022.[3]

You already know what happens when experienced builders sit beside emerging talent.

What if Norus met the next great Jamaican software engineer before they had written a university application?

HACK876 SITS HERE

05
Tech leadership
Kingston Beta and the wider ecosystem

Norus programmes as described on its own site.[3] Taking part in Hack876 does not imply access to any Norus programme, internship, grant or hiring.

An earlier hello, not a transaction.

NORUS MENTOR CORPS

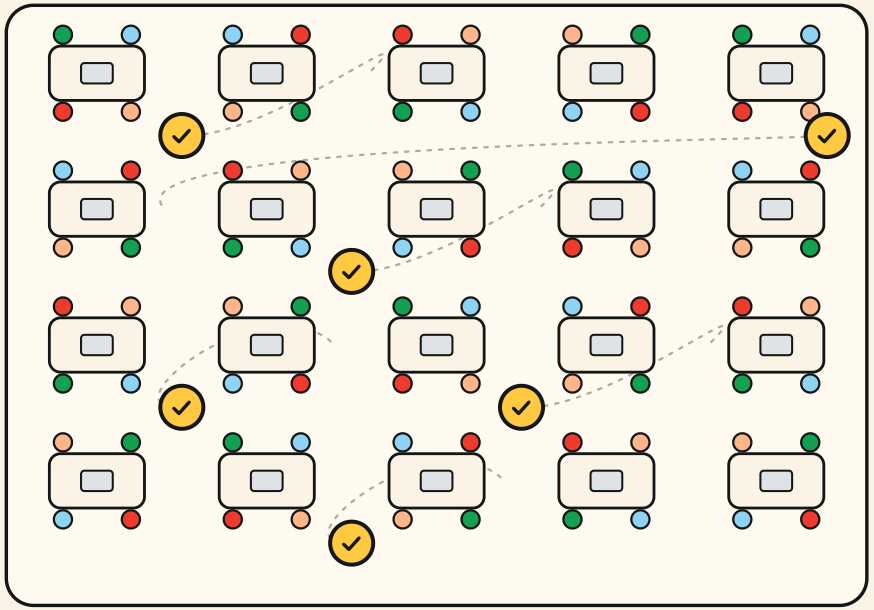

Bring the bench.

Hack876 can provide the room, the young builders, the problems, the energy and the clock.

Norus can provide something we cannot: people who build software for a living.

We would love Norus to bring as many of its team as it can reasonably make available, circulating among the 20 teams through the hacking period.

Not building the projects for students. Helping students get unstuck.

20 teams, and a handful of Norus mentors moving between them.

Ten small interventions that change a team's whole day.

01 Cutting an impossible scope into something buildable by 4 PM

02 Debugging a blocker without taking over the keyboard

03 Reasoning through architecture, APIs and integrations

04 Reviewing a data model before it becomes a problem

05 Asking whether a feature is actually necessary

06 UX and product thinking when the screen makes no sense

07 Helping a team recover when its first idea fails

08 Reviewing a demo before the judges see it

09 Telling a student who thinks they are "not technical enough" that they are

10 Translating professional habits into language a teenager can use

Students keep ownership of their work. Mentors guide; teams build.

Bring as many builders as you reasonably can.

We will put them to work helping the next generation build. Norus does not need to commit its whole team for the whole day.

- A core group for the whole hacking period
- Specialists who drop in for set windows
- Jermaine and senior staff to mentor, judge or speak
- Rotating team members in shifts
- Developers who circulate for a few hours
- Any mix that is operationally realistic

ACROSS 20 TEAMS

4 mentors	≈ 5 teams each
8 mentors	≈ 2.5 teams each
12 mentors	≈ 1.7 teams each

Even a handful of Norus mentors could materially change the day. More is even better.

We do not just want the Norus logo in the room.

WE WANT NORUS IN THE ROOM.

PROPOSED RECOGNITION

Norus Technologies

Mentorship Partner · Inaugural Hack876

- ✓ "Norus Mentor Corps" identification on-site
- ✓ A small Norus mentor help station
- ✓ Recognition on the partner page once confirmed
- ✓ Students knowing exactly who Norus mentors are and where to find them
- ✓ Mentor badges or lanyard designation
- ✓ Recognition in opening and closing remarks
- ✓ Photography and recap content

Mentors first. Everything else is welcome too.

If Norus would also like to contribute financially, these are the levels. Any amount within a level is welcome, and none of it is expected.

Bronze Partner

J$50,000 to below J$200,000

- Recognition on the Hack876 website
- Included in the grouped sponsor thank-you
- Named in the post-event recap

Silver Partner

J$200,000 to below J$500,000

- Everything in Bronze
- Placement on event signage
- Acknowledgement in the opening and closing

Gold Partner

J$500,000 to below J$1,000,000

- Everything in Silver
- More prominent placement
- A dedicated sponsor feature
- Logo on event shirts, if shirts are produced*

These are proposed benefits, to be agreed when a sponsorship is confirmed. A sponsor can contribute any amount within a band.

*Shirt placement applies only if event shirts are produced and artwork arrives before the production deadline.

Speaking, mentoring, presenting an award and judging are subject to suitability and programme capacity. Sponsorship does not buy influence over judging, and no level carries naming rights.

A low-friction yes.

A contribution at any level could help support prizes, a special award or student meals. A sponsor can support the event overall, or agree a specific use with the Hack876 team. No contribution has to cover a whole cost.

Best Design · could be presented by Norus

Boldest Idea · could be presented by Norus

People's Choice · could be presented by Norus

A meaningful in-kind contribution can be recognized at an equivalent level, based on a usable value agreed together. The advertised value of software credits or volunteer hours is not counted as cash automatically.

ELBOW GREASE · A REAL PARTNERSHIP OPTION

"I can't write a big cheque, but I can give you eight people for the day."

That is a major win for us.

- Mentors
- Judges
- Technical volunteers
- A speaker
- Project-management support
- UX and design guidance
- Day-of tech troubleshooting
- Event volunteers
- Challenge ideation
- Pre-event technical feedback
- Tech-community connections

Mix and match. There is no fixed package.

OUR PREFERRED COLLABORATION

Norus Mentor Corps

Contribution: time + expertise

Norus builders circulating among the teams, helping students get unstuck and ship.

GOLD PARTNER
Any amount within this level.
J$500K to <J$1M

SILVER PARTNER
Any amount within this level.
J$200K to <J$500K

BRONZE PARTNER
Any amount within this level.
J$50K to <J$200K

IN-KIND & COMMUNITY SUPPORT
Devices, Gift cards, Meals, Refreshments, Supplies, Connectivity, Expertise, and contributions below J$50,000.
In kind

COMBINATIONS WELCOME

- Mentors only
- Mentors + a Bronze contribution
- Mentors + food
- Mentors + a contribution toward prizes
- A financial contribution without staffing

There is no faceless sponsorship process here.

Stefen is asking **Jermaine Henry, CoFounder & CEO of Norus**, directly.[2]

We would especially love you in the room yourself, as a judge, mentor, speaker or just someone students get to meet. But Norus taking part does not depend on it.

If Norus is interested, we can decide together what involvement should actually look like.

QUESTIONS WE WOULD ANSWER TOGETHER

- ✓ How many Norus team members can take part?
- ✓ Who should mentor, and when?
- ✓ Would Norus also like to contribute toward prizes or food?
- ✓ Does one of the special awards fit?
- ✓ Would Jermaine like to judge or speak?
- ✓ Is there a contribution Norus thinks would be more useful?

A conversation, not a workload.

We are building the first one.

Approximately 80 students, 20 teams, a 9-school organized network and one day in Kingston.

Deliberately focused. We will not promise national logistics we cannot deliver yet.

Build it well.
Learn.
Earn the right to make it larger.

No multi-year commitment required.

2027

Come help these kids ship.

That is the whole ask.

FUTURE POSSIBILITIES, ONLY IF BOTH SIDES FIND YEAR ONE VALUABLE. NOT COMMITMENTS.

- The Norus Mentor Corps returning each year
- Pre-event build workshops for teams
- Connections for Hack876 alumni into Jamaica's tech community
- Mentoring students from beyond Kingston as Hack876 grows
- Norus judges on the finals panel

HACK876 × NORUS TECHNOLOGIES

A student may forget whose logo was on the wall.

They will remember the engineer who sat beside them when their project broke.

Hack876 gives young Jamaicans one day to discover what they can build. Jermaine, we would love Norus Technologies to put some of Jamaica's working builders in the room with them.

That is the invitation.
