

Obvious already knows Jamaican builders. Help us reach the next ones.

Hack 876 is bringing about 80 Jamaican secondary-school students together for one day to build, ship and present something real.

We'd love Obvious to help put real tools, not toy demos, in the hands of the teams that want them.

01 WHY THIS IS PERSONAL

From Frontier to Hack 876.

I first got to know Obvious by showing up as a builder. At Frontier Build in Atlanta, I built YardToonz Reactive solo, a production pipeline for a Jamaican claymation comedy brand, and got to experience the team and the community firsthand.

Now I'm helping organize Hack 876 for secondary-school students in Jamaica. Obvious has its own Jamaican ties, so this felt like a very natural conversation to have.

A FAMILIAR FACE

Saran Duncan on the Obvious team went to St. Andrew High School for Girls, one of the schools we're already talking with. If she's open to it, we'd love her to be Obvious's point of contact for Hack 876.

02 WHY THIS FITS

Hackathons are where tools become real.

Students don't need another AI demo.

They need a problem, a clock, a team and tools strong enough to help them move. Hack 876 builds that room. Obvious can add leverage inside it.

We're not looking for Obvious to bankroll the event. Local sponsors are helping us with the core costs. What would matter most from Obvious is the builder layer.

01 Credits

API or token credits for teams that choose to build with Obvious.

02 Prizes

A few lightweight awards for the smaller categories.

03 People

Anyone from the team who wants to judge, mentor or speak.

03 THE BUILD

Think. Build. Ship. Present.

~80

STUDENTS

≤4

PER TEAM

1

DAY

01 / think

Think

Find a real problem worth a day.

02 / build

Build

Turn it into a working prototype.

03 / ship

Ship

Get it running. Real beats polished.

04 / present

Present

Demo it and defend the decisions.

Hardware

Games

Fintech

Education

Civic tech

Design-led

// AI is allowed, not required.

04 THE MAIN ASK

Give the teams **credits**.

We're asking Obvious for API or token credits for Hack 876 teams that want to build with Obvious during the event.

No sponsorship package. No tiers. Just meaningful access to the tool.

Team-level credits

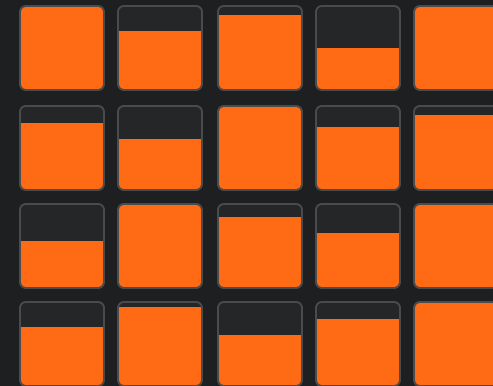

One event-level pool

Shared, controlled access

Whatever Obvious recommends

credits / 20 teams

● proposed

access: opt-in, per team

structure: set by Obvious

Many participants are under 18. We're happy to structure access around Obvious's account and age requirements. Where a tool needs an adult account holder, Hack 876 can require an 18+ member on that team.

A little extra goes a long way.

Local funding is covering the core event. If Obvious wants to add something, the smaller awards are where it would show most.

- Gift cards
- Obvious credits
- Developer gear
- Small hardware or accessories

Best Design

Looks great. Feels even better.

OPEN

Boldest Idea

The swing nobody else took.

People's Choice

Voted by the room.

OPEN

06 IF OBVIOUS WANTS TO SHOW UP

The door is very open.

remote | in person

JUDGE

Help evaluate what students build.

MENTOR

Spend part of the day helping teams get unblocked.

SPEAKER

Share how modern AI products actually get built.

CHALLENGE

Recognize the best agentic or Obvious-built project.

If someone from Obvious wants to spend a few hours with Jamaica's next generation of builders, we'd love to have them. Saran, that very much includes you.

A "Best Use of Obvious" or "Best Agentic Build" award is possible if you want it. It's optional, and the event stays platform-neutral.

LET'S BUILD SOMETHING USEFUL TOGETHER

The next builder shouldn't have to wait until university to use serious tools.

Hack 876 is building the room. We'd love Obvious to help put more capability inside it.
