HACK876 × SANDALS FOUNDATION

PRIVATE EXPLORATORY BRIEF

Let the learning continue after the demo.

The Sandals Foundation looks for lasting benefit, not a single day. We would like to introduce Hack876 and ask whether what happens after the event could ever be a fit.

WHAT HACK876 IS

A one-day build competition in Kingston for about 80 secondary-school students, 5th Form through Upper 6th Form, working in teams of 3 to 4. Teams pick a real problem and finish the day with a working prototype and a pitch to judges.

When: Saturday, February 20, 2027 (tentative)

Where: Spanish Court Hotel, Kingston (confirmed)

Who: About 80 students, roughly 20 teams

Organisers: Nadani Dixon and Stefen Ewers

WHY THE SANDALS FOUNDATION

Education is one of the Sandals Foundation's focus areas, including digital literacy, and its guidelines look for lasting benefit.

WHAT WE ARE ASKING

An introduction, and an honest answer on whether the work that follows Hack876 could ever fit the Foundation's guidelines.

No funding request in this brief

WHAT IT MAKES POSSIBLE

It tells us whether to design follow-up resources and mentoring with a future cycle in mind.

WHAT WE HOPE TO LEARN

Whether a route exists, what lasting benefit would need to look like, and who to speak with.

THE NEXT STEP

A short reply through the Foundation's contact page to say whether a conversation is worthwhile.

Nadani Dixon and Stefen Ewers, Hack876 organisers · info@hack876.com

An introduction, and a question about fit.

WHAT WE UNDERSTAND FROM THE PUBLISHED GUIDELINES

The 2027 guidelines require legally registered organisations and long-term benefit. They exclude one-off events without sustainable impact, and sponsorships or prizes without broader community benefit. The concept window closed on July 27, 2026. We do not assume Hack876 is eligible, and this is not a late submission.

WHY THE SANDALS FOUNDATION

Education is one of the Foundation's strategic focus areas, covering school infrastructure, teacher training, digital literacy and scholarships.[1]

In 2021 the Foundation and Rainforest delivered some fifty digital tablets to students at St Mary Primary School in Above Rocks, St. Catherine.[2]

Its Lessons Alive campaign, from August 2020, raised funds for digital tablets for vulnerable primary school students.[2]

WHAT WE WOULD LIKE TO ASK

- ✓ Is there a future or alternative route that could suit work like this?
- ✓ Would reusable school resources be closer to what the Foundation supports?
- ✓ Would follow-up mentoring count as lasting benefit?
- ✓ Who is the right person to speak with, and when?

Areas a conversation could cover: materials, equipment, programming. These are ideas to explore. None is an agreed activity or a funding request.

This brief is not an application and does not assume Hack876 is eligible for funding. It asks whether a suitable route exists.
