HACK876 × SEEED STUDIO

PRIVATE PARTNERSHIP BRIEF

Give students a network they build themselves.

Hack876 gives Jamaican high-school students one day to turn an idea into something real. We would love Seeed hardware on the table when they do.

WHAT HACK876 IS

A one-day build competition in Kingston for about 80 secondary-school students, 5th Form through Upper 6th Form, working in teams of 3 to 4. Teams pick a real problem and finish the day with a working prototype and a pitch to judges.

When: Saturday, February 20, 2027 (tentative)

Where: Spanish Court Hotel, Kingston (confirmed)

Who: About 80 students, roughly 20 teams

Organisers: Nadani Dixon and Stefen Ewers

WHY SEEED

Seeed's Meshtastic Community Sponsorship provides kits to community events that apply at least three weeks ahead.

WHAT WE ARE ASKING

Seeed's standard Meshtastic package: 10 DIY kits, a SenseCAP T1000-E and a Wio Tracker L1.

WHAT IT MAKES POSSIBLE

Hardware teams build nodes that join one off-grid mesh network across the room, at a supervised station.

WHAT SEEED RECEIVES

Hardware Partner recognition, and the standard deliverables Seeed asks of sponsored events.

THE NEXT STEP

We will apply through Seeed's Meshtastic Sponsorship Application once the date is confirmed, and ask which LoRa frequency variant suits Jamaica.

Nadani Dixon and Stefen Ewers, Hack876 organisers · info@hack876.com

01 THE REQUEST

What we are asking for, and how it would be used.

We are asking for hardware, not cash. Seeed's standard Meshtastic package is a great start, and we would ask Seeed whether an upgrade fits an event of our size.

- **Seeed's standard Meshtastic package: 10 DIY kits, a SenseCAP T1000-E and a Wio Tracker L1**
- **An upgraded quantity, if Seeed thinks our event and content justify it**
- **Grove sensor kits for teams building other kinds of hardware**

QUANTITIES, TIMING AND DELIVERY

Shipped to Kingston on Seeed's standard DAP terms. Hack876 pays duties and clearance.

Applied for at least 3 weeks before the event, plus time for customs.

Used only at a supervised station with an adult hardware mentor.

WHY SEEED

Seeed opened its Meshtastic Hardware Sponsorship Program to lower the barrier for technical workshops and community-led infrastructure projects.[3]

Approved workshops get a standard hardware package so participants can build a complete Meshtastic network and have a hands-on experience.[1]

Seeed's sponsorship application lists STEM students and educators as a target audience.[4]

WHAT SEEED WOULD RECEIVE

Hardware Partner · Inaugural Hack876

A meaningful in-kind contribution can be recognized at an equivalent level, based on a usable value agreed together. The advertised value of software credits or volunteer hours is not counted as cash automatically.

Real radios. Real networks. Built in a day.

Seeed's Meshtastic kits for teams on the Hardware build type: small LoRa boards that join up into an off-grid mesh network. Teams that want them use them, nothing about the event depends on them, and every kit is used under adult supervision.

POSSIBLE STRUCTURES

- Shared hardware table: kits live at one supervised station, and teams sign them out and return them at the end of the day.
- Kits per team: each hardware team builds its own node, and every node joins one shared mesh across the room.
- Prizes: kits go home with winning teams, through their schools, so they keep building.
- Whatever Seeed recommends instead, including the mix of kits, trackers and Grove sensors that works best.

AGE AND ACCOUNT TERMS

Every kit is low-voltage and used only at supervised stations with an adult hardware mentor. Students do not open, modify or swap batteries. Seeed's wiki recommends a qualified 3.7V lithium battery with a protection circuit for these kits, and we would follow that and every other Seeed safety note. Meshtastic devices need the right LoRa region set, so before the day we will confirm with Seeed which frequency variant suits Jamaica and that its use here is permitted. Seeed's standard shipping terms are DAP, with duties and clearance fees paid by the receiver, so Hack876 would plan for those and allow extra time for customs. Seeed has not agreed to any of this, and we will follow its advice.

GROUND RULES WE WILL HOLD OURSELVES TO

Low-voltage hardware only, always under adult supervision. No mains wiring, and no opening or modifying batteries.

No student data shared with Seeed. Photos of students go out only with parent or guardian consent, and attendee feedback is shared without names.

No marketing to students. Seeed's name appears on our slides and printed materials as its program asks, never in sign-up or sales drives aimed at students.

03 DELIVERY AND NEXT DECISION

Who is running it, and what we need from you.

ORGANISERS	Nadani Dixon (Redfin) and Stefen Ewers (Anthropic Claude Ambassador) lead the event and are the contacts for this proposal.
VENUE	Spanish Court Hotel in Kingston is confirmed as the venue.
DATE	Saturday, February 20, 2027 is the working date. It is tentative until confirmed with schools.
JUDGES	7 judges have confirmed, from Tesla, Microsoft, Meta, Google, Accenture, Diageo, HashiCorp.

Schools: 1 confirmed, 2 in talks, 6 not yet confirmed, from a network of 9 in Kingston. Sponsors do not receive student contact details, and there are no sign-ups or selling on the day. Photos and names are used only with school and parent consent.

THE DECISION WE ARE ASKING FOR

We will apply through Seeed's Meshtastic Sponsorship Application once the date is confirmed, and ask which LoRa frequency variant suits Jamaica.

Seeed asks organisers to apply at least 3 weeks before the event date, with a shipping address and phone number.[4]

Your contact: Nadani Dixon and Stefen Ewers, Hack876 organisers · info@hack876.com

WHAT YOU WOULD RECEIVE AFTERWARDS: A WRITTEN RECAP

- ✓ **How many students, teams and schools took part**
- ✓ **What the teams built, with the finalist projects described**
- ✓ **How your contribution was used**
- ✓ **Photos, only where schools and parents have consented**

We do not report reach, impressions or leads, and we do not share student contact details.
