HACK 876 × MLH

PRIVATE PARTNERSHIP BRIEF

Jamaica has the students. We're building the room.

Hack 876 brings about 80 Jamaican secondary-school students together for one day to build, ship and present something real.

WHAT HACK876 IS

A one-day build competition in Kingston for about 80 secondary-school students, 5th Form through Upper 6th Form, working in teams of 3 to 4. Teams pick a real problem and finish the day with a working prototype and a pitch to judges.

When: Saturday, February 20, 2027 (tentative)

Where: Spanish Court Hotel, Kingston (confirmed)

Who: About 80 students, roughly 20 teams

Organisers: Nadani Dixon and Stefen Ewers

WHY MLH

MLH has spent years helping student hackathons run well, and Mike met one of our organisers as a hacker at HackGT.

WHAT WE ARE ASKING

Hacker swag for first-time hackers, such as stickers, shirts or lanyards, and MLH's guidance on running the day well.

WHAT IT MAKES POSSIBLE

For many of these students it is a first hackathon. They leave feeling part of a wider builder community.

WHAT MLH RECEIVES

A first student hackathon in Jamaica that follows MLH's guidance, with MLH recognised as a community partner, and a written recap.

THE NEXT STEP

A reply from Mike on what MLH could send or share. No funding is requested.

Nadani Dixon and Stefen Ewers, Hack876 organisers · info@hack876.com

01 A NOTE FOR MIKE

From hacker to organizer.

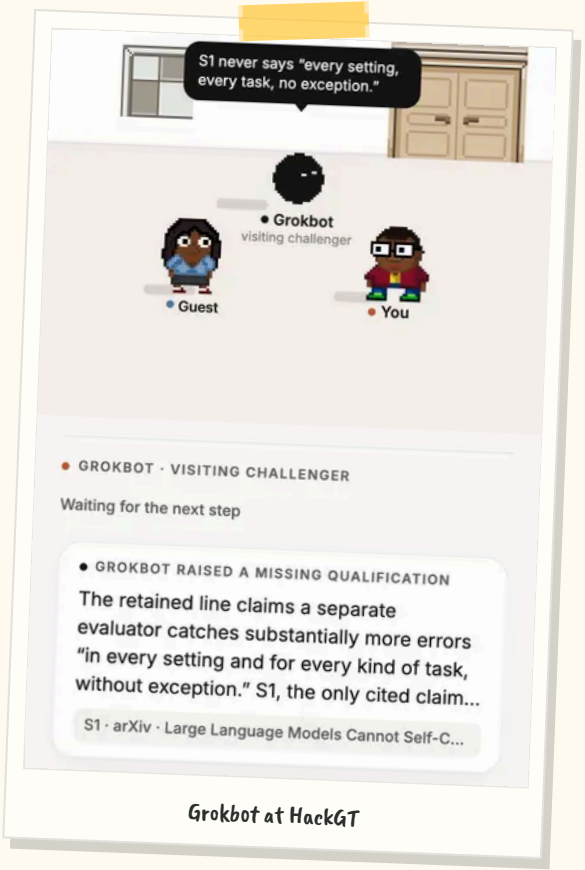

Mike, we met at HackGT while my teammate and I were building Thinketh. You spent some time with us, liked what we were building, and even snapped a photo of our Grokbot to share with the Grok team.

A few days later, I'm reaching out from the other side of the table.

I'm helping build a hackathon.

Hack 876 is the event I wish more Jamaican students could experience before university.

Stefen

Grokbot at HackGT

02 THE BIGGEST ASK

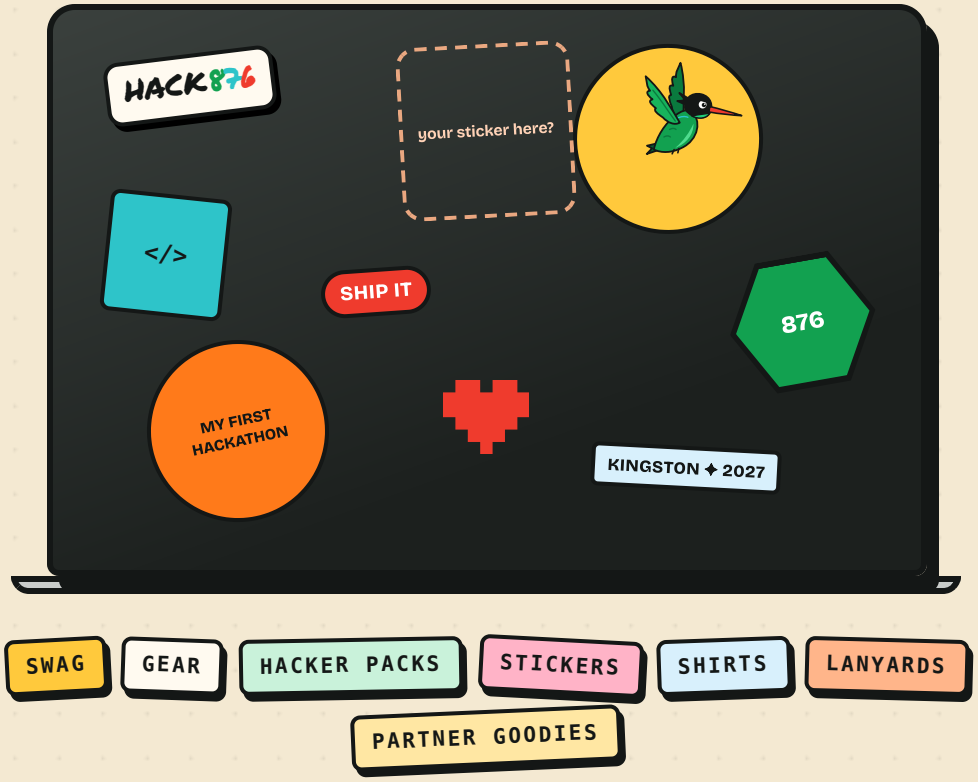

Help us give them the hacker experience.

For many Hack 876 students, this will be their first hackathon. We want them to leave with more than a project.

The stickers on their laptop. The shirt they still wear months later. The lanyard in a drawer. The feeling that they joined a global builder community for a day.

This is our biggest tangible ask from MLH.

Not luxury prizes. Just the things that make it feel legit.

We're doing the work. We'd love the experience.

GUIDE

Share what works: judging, rules, code of conduct, submissions, team formation, demos, pacing and student safety.

SHOW UP

Send a coach, mentor, judge or speaker. Remote or in person.

CONNECT

Where it fits, help us reach the developer tools, credits and partner resources MLH brings into hackathons.

AFFILIATE

Help us understand whether there is an MLH structure that fits a secondary-school hackathon in Jamaica.

Not a funding ask. Hack 876 is already in active conversations with Jamaican companies about financial support. We're coming to MLH for expertise, culture, resources and a connection to the wider hackathon community.

Help us give 80 Jamaican students their first great hackathon.

If there's a way for MLH to be part of Hack 876, we'd love to figure out what that looks like.

Mike, if Jamaica sounds like a good place to judge a hackathon, the door is very open.
