HACK 876 × OBVIOUS

PRIVATE PARTNERSHIP BRIEF

Obvious already knows Jamaican builders. Help us reach the next ones.

Hack 876 brings about 80 Jamaican secondary-school students together for one day to build, ship and present something real.

WHAT HACK876 IS

A one-day build competition in Kingston for about 80 secondary-school students, 5th Form through Upper 6th Form, working in teams of 3 to 4. Teams pick a real problem and finish the day with a working prototype and a pitch to judges.

When: Saturday, February 20, 2027 (tentative)

Where: Spanish Court Hotel, Kingston (confirmed)

Who: About 80 students, roughly 20 teams

Organisers: Nadani Dixon and Stefen Ewers

WHY OBVIOUS

One of our organisers built at Obvious's Frontier Build in Atlanta and saw the team and its community firsthand.

WHAT WE ARE ASKING

API or token credits for the Hack 876 teams that choose to build with Obvious during the event.

No sponsorship package and no tiers. No funding is requested.

WHAT IT MAKES POSSIBLE

Teams can build with a serious AI tool for a day, under whatever access structure Obvious recommends.

WHAT OBVIOUS RECEIVES

Recognition as a tools partner, and a written recap of what teams built with Obvious.

THE NEXT STEP

A reply on whether credits are possible, and how Obvious would want access set up. Judges, mentors and speakers from Obvious are welcome too.

Nadani Dixon and Stefen Ewers, Hack876 organisers · info@hack876.com

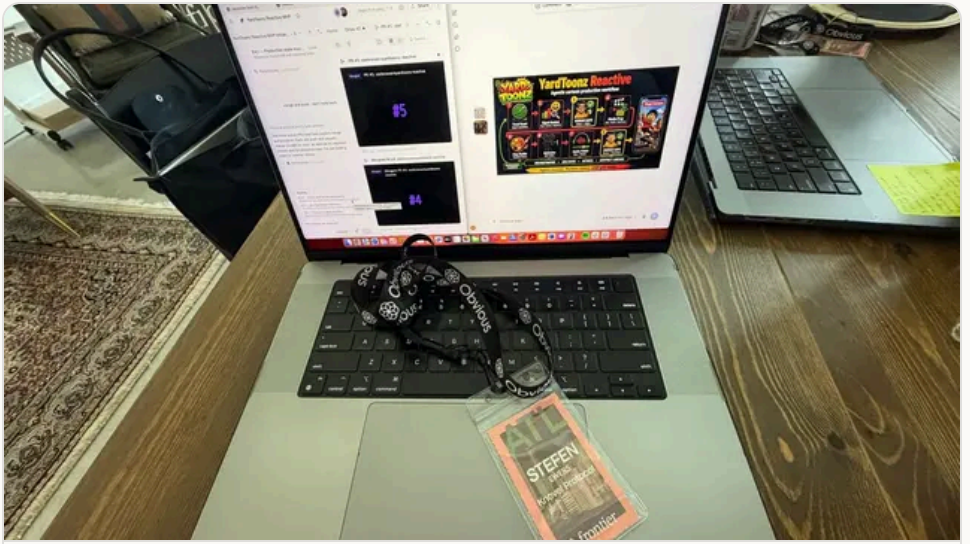

01 WHY THIS IS PERSONAL

From Frontier to Hack 876.

I first got to know Obvious by showing up as a builder. At Frontier Build in Atlanta, I built YardToonz Reactive solo, a production pipeline for a Jamaican claymation comedy brand, and got to experience the team and the community firsthand.

Now I'm helping organize Hack 876 for secondary-school students in Jamaica. Obvious has its own Jamaican ties, so this felt like a very natural conversation to have.

A FAMILIAR FACE

Saran Duncan on the Obvious team went to St. Andrew High School for Girls, one of the schools we're already talking with. If she's open to it, we'd love her to be Obvious's point of contact for Hack 876.

02 THE MAIN ASK

Give the teams credits.

We're asking Obvious for API or token credits for Hack 876 teams that want to build with Obvious during the event.

No sponsorship package. No tiers. Just meaningful access to the tool.

- Team-level credits
- One event-level pool
- Shared, controlled access
- Whatever Obvious recommends

Many participants are under 18. We're happy to structure access around Obvious's account and age requirements. Where a tool needs an adult account holder, Hack 876 can require an 18+ member on that team.

03 IF OBVIOUS WANTS TO SHOW UP

The door is very open.

remote | in person

JUDGE

Help evaluate what students build.

MENTOR

Spend part of the day helping teams get unblocked.

SPEAKER

Share how modern AI products actually get built.

If someone from Obvious wants to spend a few hours with Jamaica's next generation of builders, we'd love to have them. Saran, that very much includes you.

The event stays platform-neutral. Teams choose their own tools, and every award is open whatever they build with.

LET’S BUILD SOMETHING USEFUL TOGETHER

The next builder shouldn’t have to wait until university to use serious tools.

Hack 876 is building the room. We’d love Obvious to help put more capability inside it.
